MISANTROF ANTIRECORDS is proud release the evil debut of HELZGLORIAM:

Infernal Monarchy

HELZGLORIAM is pure evil hailing from Persia: the group is ruled by the dark magic of passion and is inspired by the memories of ancient Satanic cults in The East. Is inspired by what the great Persian Empire meant. This is the beginning before any end. This is pure and unique energy created by musicians accepting SATAN as their creator and strongly intending to promote the mysteries of chaos in reality.

It is probably easy to be satanist, to worship the dark side and play music about it. It's easy in Europe. In the USA. But what about Persia? What about an Islamic Republic? What about the countries and the problems surrounding the place where HELZGLORIAM is hailing from?

We in Misanthrof celebrate this open mind attitude. We celebrate and support the courage and this true devotion to craft impressive music painting dark pictures, descending on the obscure kingdom. We admire the strength needed to craft this music in absolute underground, far from any public, in an obdurate and hidden environment, where playing live -the natural thing any musician shall think about- is not either easy or ... possible.

Seen from this side, the majesty of "Infernal Monarchy" is even deeper, stronger, heavier, darker.

It raises the satanism to new levels of both purity and perversion.

And in Misanthrof we want this obscure essence to be glorious, to keep on fighting against the destructive religions, to continue fueling the war against Judaism, Islam and Christianity, against these the real enemies, the real threats to human kind.

HELZGLORIAM is sublime symphonic black metal with extreme power, groove and energy. It sounds heavier and darker than most modern Scandinavian music of the same genre nowadays. "**Infernal Monarchy**" is purely dark lord worshipping.

This is what you were waiting for. This is what you needed. This is your beginning. This is your end.

....And death is whispering in the desert winds and SATAN is rising with the sandstorms...
